## EXPERIENCE

---

### Computer Science Instructor

Mar. 2023 - Present

Whizkidz Computer Center | Remote

- Conducted small-group, weekly classes on introductory computer science concepts in Java, Python, and more, resulting in improved student comprehension at a young age
- Designed and created supplementary lesson material using coding examples and slide decks to aid students effectively

### Computer Room Consultant Junior

Sep. 2021 - Present

Information and Educational Technology | Davis, CA

- Provided hardware and software assistance to 20,000+ UC Davis staff and students that visit the computer lab annually
- Guided UC Davis instructors in setting up software and during class times to ensure class goes smoothly, maintaining high quality and quick customer service
- Won Student Employee of the Quarter in March 2023, displaying excellent communication, work ethic, and helpfulness

### Frontend Developer

Jan. 2023 - Apr. 2023

#include at UC Davis | Davis, CA

- Developed an agile website over the span of 10 weeks with a small cross-functional team to create a website for Interactive Elementary Learning Center (IELC), a local Davis tutoring service, to advertise their services more effectively
- Communicated with other developers, designers, and project managers 3-5 times/week to debug issues
- Programmed website using HTML/CSS, JavaScript, React, NodeJS, and Git through frameworks from the design team

### Technology Instructor

Jun. 2022 - Aug. 2022

Edventure More | San Francisco, CA

- Facilitated, structured, and executed lesson plans for 20+ children weekly in grades 1-5, creating a healthy space for children to learn social skills and grow in their knowledge of computer science
- Taught children coding and basic game design using Scratch, Minecraft: Education Edition, and Roblox Studio
- Designed 1-3 new lesson plans weekly with attention to detail based on the age, knowledge, and needs of a given class

## EDUCATION

---

University of California, Davis | Bachelors of Science in Computer Science | 3.74 GPA

Expected Jun. 2024

- Dean's List in Winter 2021
- Relevant classes: Discrete Math, Object-Oriented Programming (C++), Algorithms and Data Structures (C++), Computer Organization in Assembly, Algorithm Design and Analysis, Prob. & Statistics Modelling, Computer Networks

## PROJECTS

---

GluChart | Hackathon Team Project | gluchart.azurewebsites.net

May 2023

- Worked with a cross-functional team to create GluChart, a machine learning model hosted by Microsoft Azure that allows diabetic users to see their current and future blood sugar levels based on inputted glucose, meal, and insulin levels
- Won Best Hack for Social Good and Best Healthcare Hack

Zion Lutheran Website Redesign | Personal Project | zionsfschool.netlify.app

Sept. 2022 - Jan. 2023

- Redesigned Zion Lutheran's website from scratch using HTML, CSS, and Javascript, with an emphasis on increasing simplicity and eased user experience and interaction
- Featured homepage with snap scrolling, user-friendly menus and buttons, and is fully functional

## SKILLS

---

- **Frontend development:** HTML/CSS, JavaScript, React.js
- **Backend development:** C++, C, C#, Python, Java
- **Operating systems/other:** Windows, MacOS, Linux, Git, x86 Assembly
